Sinclair Broadcast Group uses public airwaves and is obligated by law to serve the public interest and is not doing so by choosing to broadcast the "anti-Kerry" film Friday, Oct. 22nd via all of its 62 outlets. This is only a few days before the election and sets an agenda that will influence votes. This program is certainly not a news program presenting facts – it is only opinions. This type of programming is surely not within the laws of media broadcasting.
